

“CityWalk”-Project launch event

Walkability: A Prerequisite for Livable Cities

Tuesday, 07. February 2017; 09:30 – 13:15

Venue: Hotel Soleil**** H-6724 Szeged, Kelemen László u. 7.

Dear Sir or Madam,

First Hungarian Responsible Innovation Association and partnership of the project CityWalk (Towards energy responsible places: establishing walkable cities in the Danube Region- co-founded by EU funds) are **delighted to invite you to the lunch event of the project. This meeting will be the official start of our project.**

Increasing greenhouse gas emissions and congestions are negative side effects of urbanization, resulting from inefficient and unsustainable local transport systems. A key challenge in cities is to improve transport systems and accessibility in an environmentally-friendly manner. CityWalk (DTP1-1-045-3.1-Towards energy responsible places: establishing walkable cities in the Danube Region) project will result in improved urban mobility - while reducing emissions, noise levels and congestions, increasing safety and making cities more liveable places (and also contributing to a healthier population).

Although the emphasis is on walking, the proposed project addresses the challenge with a holistic approach – improving urban mobility through efficiently combining various means of transport. Efficient urban transport systems, with an emphasis on active forms of transport – especially walking have various conditions – we help cities in the Danube Region to identify the obstacles, develop and implement a plan to address those obstacles.

Please register yourself at vizinoemi2@gmail.com by the 04. February.

We are looking forward to meeting you in Szeged.
Partnership of project Citywalk.

A stream of cooperation

AGENDA:

*Venue: Hotel Soleil**** H-6724 Szeged, Kelemen László u. 7*

9.00 -9.30 *Welcome coffee and registration*

9.30-9.45 *Welcome speech – Dr. Miklós LUKOVICS – First Hungarian Responsible Innovation Association*
